Appendix A – Use of Artificial Intelligence

AI Tool Used

- ChatGPT (OpenAI)

Purpose of Use

The AI tool was used for:

- Brainstorming ideas for the pet shop website.
- Refining the website structure and navigation.
- Understanding implementation approaches for HTML, CSS, JavaScript, Node.js, and database integration.
- Clarifying concepts related to responsive web design and server-side development.

Prompt 1

Suggest features for an online pet shop website developed using HTML, CSS, JavaScript, Node.js, and a database.

AI Output:

Suggested features included:

- Product catalogue for pet food and accessories.
- Shopping cart functionality.
- Product search and filtering.
- Checkout page.
- User account management.
- Database integration for storing products and orders.

Prompt 2

Explain how to connect a Node.js application to a database for managing pet shop products.

AI Output:

Node.js can connect to a database using packages such as mysql2. The application can retrieve product information, update stock levels, and manage customer orders through database queries.

Prompt 3

Provide recommendations for making a pet shop website responsive on mobile devices.

AI Output:

Recommendations included:

- Using Flexbox and CSS Grid layouts.
- Applying media queries.
- Using responsive images.
- Implementing a mobile-first design approach.

Reflection

The AI tool was used only for brainstorming, idea generation, and learning support.
